WHAT is DESIGN?!

>>>>>

Design

A design is a concept of either an object, a process, or a system that is specific and, in most cases, detailed. Design refers to something that is or has been intentionally created by a thinking agent, though it is sometimes used to refer to the nature of something.

Use the program to process and organize your own work. Practice (and patience) is key!

You'll naturally create clusters of things that often come together. Often starting with a cluster of rough copy work, but only before the real detailed real work starts to come along!
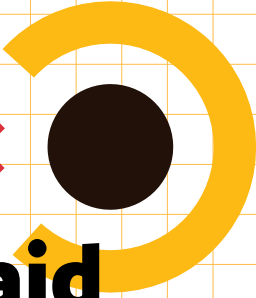

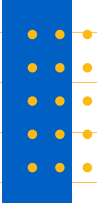

My biggest advice?
Click around and don't be afraid to mess things up!
