

## ABOUT

**Daniel Kim,  
58 years old**

*Daniel owns his own semi-detached home in a downtown location. He retired early from his job and now works part-time as a consultant out of his home. He wants to stay in this home and familiar neighborhood over the long term, but he has not explored whether the home is suitable or affordable for later life.*

*Daniel does not know the risks he may face (e.g., accessibility, safety, or financial) while remaining in this home over the long term. He needs help taking the first steps to explore his housing plans and priorities.*
